

The NAB should accept competition and change their operating procedures. If broadcasting content were more interesting and provided less pop culture and more information I would have never had to get XM Radio. XM Radio is helpful with traffic and weather and is the only place in the nation I can hear actual musical artists like Van Morrison, Miles Davis, Robert Johnson, and countless other artists that have been overshadowed by the commercial interest with their manipulating of our society into believing HIP HOP and Teen Pop is actually music. Every needle you put into XM radio will stifle the future evolution of our society, culture, and country. Traditionally America has advanced through broad communication and its technological improvements i.e AM radio to TV to FM radio to Cable/satellite TV to Internet to XM. Should you follow through with the financial interest of the NAB, you will be retarding the advancement of America and mankind. Consider the best interest of the people, rather than the financial interests of corporations. Additionally remember your predecessors vision in allowing the advancement of TV when radio was in opposition of that medium. Vote in opposition of HR 4026!

Thank you,

Hugh Morris

Humor - the real sixth sense...
